

# Copy Structure

## What it does

Will copy all fields except files and pictures, but all sub child entities (1 level, non recursive).

## How to invoke

The page is called with the command:

**dk.tempusserva.codeunit.common.PageCopyStructure**

Takes the following parameters

- SagID
- DataID

The user activating the function must have the group specified in "AllowCloneGroup"

Example of usage:

```
main?command=dk.tempusserva.codeunit.common.PageCopyStructure&SagID=10&DataID=100
```

Button for the function can be created using a "Action button: Button: Parameterized URL"

Example of URL pattern

```
main?command=dk.tempusserva.codeunit.common.PageCopyStructure&SagID=10&DataID=[DataID]
```

## Configuration

[All possible configurations and where to edit them]

# Developer info

- Type: CodeunitPagecontent
  - Security: [eg. requires admin or session]
  - Classpath: dk.tempusserva.codeunit.common.PageCopyStructure
-
