Codeunit

This widget displays raw HTML output from any PageContentCodeunit.

Distribution

This creates one of many diagrams to show records of an entity. Bar, circle, and table diagrams work, but the others don't.

It should at the very least have the SagID of the entity and a QUERY_GROUPBY parameter to know what should be shown. If it does not have this, it will always show the status of the records.

Content should look something like this:

`?SagID=3&QUERY_GROUPBY=TOPIC`
