

Status Overview

Added in version 11977.

Shows a simple overview of amount of records in different status's (and status groups), with an custom line title and color.

Sample

Configuration

The widget expects the "solution" to be the system name of the entity/solution that data is shown from, and the content to be setup in the following manner.

The css class part is optional.

```
[Line name]#[Line CSS class]:[Comma-list of StatusID or StatusSystemName]
```

Eg.

```
New tasks#orange: 57, NEW
```

```
In progress#blue: 58
```

```
Done#green: 59, DONE
```

Translation

Add content-translation formatted like this:

```
da:Nye opgaver
```

```
Igang
```

```
Færdig
```

Styling

The colors green, blue, yellow, orange and red, are defined by default in the platform.

To use a custom color, use a custom css class in the configuration and add the following code to the widgets style.

```
#THISWIDGET# .my-color .bar .bar-progress {  
  background-color: var(--primary);  
}  
#THISWIDGET# .my-color .badge-col .badge {  
  color: #FFF;  
  background-color: var(--primary);  
}
```
