

# What are Stylesheets

Stylesheets can be applied in three ways

- Attached to solution
- Attached to solution interface
- Default application stylesheet

Stylesheets are defined in: Designer > Ressources > Stylesheet

Stylesheets contain CCS code to markup the page elements. The stylesheets may inherit content from each other, which is specified by the *Parent stylesheet*. Parent stylesheets are automatically prepended to the stylesheet in question, so definitions may be overloaded if needed.

A good ressource for learning CSS can be found here: <http://www.w3schools.com/css/>

The default stylesheet for the application is defined in the policy: **defaultStylesheetID**
