Compliance

TS No-Code Platform is designed to make sure that systems built on can be compliant without any work that needs to be done

- Security (ISO27k and ISAE)
- EU law (GDPR etc)
- Financial regulation

OWASP security

Depending on setup of the server OWASP level 1 or level 2 can be reached. This includes almost all security requirements such as

- Mitigation of common threats (SQL injection, CSRF etc.)
- Request throttling
- Password reset procedures
- Logging (see below)
- Multifactor authentication

Read more about it in Security setup

GDPR support

Data can be marked up and coupled to automatic deletion or anonymization,

WCAG (disability)

The UI supports the guidelines required for screen readers to work.

Key navigation

Nearly all operations in TS No-code can be performed without the need of a mouse or touchscreen.

Note that the behaviour is slightly different based on which facet of the system is displayed.

Main menu

Simple / Standard

key(s)	function	notes
Escape (ESC)	Select "Logout" action	
Tabulator (TAB)	Navigate to next tab element (menu/solution)	Ignore add, views and recent items
Arrow up/down	Navigate to next solution in menu	Ignore add, views and recent items
Arrow right/left	Select next menu item	

Advanced / Accordion

key(s)	function	notes
Escape (ESC)	Select "Logout" action	
Tabulator (TAB)	Select next solution **in active section**	Ignore add, views and recent items
Arrow up/down	Show/hide different solution sections	
Arrow right/left	Select next menu item	

This version of the menu requires a special need for combined use of

1. UP/DOWN: select section
2. TAB: select solution
3. ENTER: show solution

Note that the section selection is saved to a cookie, to ensure that the same sections are displayed as on previous visits.

List mode

Note: The "Add record" is automatically selected when entering a list

key(s)	function	notes
any letter (a-z)	Open quicksearch at top of the page	Search is always visible with touch devices
Escape (ESC)	Select "Main menu" action (go back)	
Arrow up/down	Navigate to records in list	Enter will open record in edit mode
Arrow right/left	Select next menu item	

Form mode

Normally focus will be set to the first input element in the form.

key(s)	function	notes
Escape (ESC)	Select "Display list" menu item (go back)	
Tabulator (TAB)	Navigate to next input field	Skips links for upload, sub record creation etc.
Enter (ENTER)	If in input box: Data will be submitted	Standard www behaviour

Arrow keys are excluded because they are used in text areas etc.

Traceability

Applications can have the following logging

- Access log
- Action log (events and actions)
- Revision log (copy of all changes)

Additionally the user management can provide

- Login history
- History of former group membership

Finally all changes to an application are logged centrally
