

Export excel

Export will create and download a file readable by Microsoft Excel or any other 3rd party Office product.

Export file options include

- **All records:** Unlike the default limited to the records displayed in this page
- **All fields:** Unlike default limited the fields displayed in the current view
- **Explode parents:** Include data from related **parent** records
- **Explode children:** Include data from related **child** records in denormalized (flattened) form
- **System export:** Use system name in columns (good for later CSV imports)

After downloading the file you should save it in you preferred format using "Save as ...".
