

Status routing

The routing feature provides options for changing a records status automatically.

To do routing you need the following

- A test case
 - A field reference
 - Compare operator (ex. "=")
 - Compare value (ex. "Hello world")
- Status set if the test is POSITIVE
- Status set if the test is NEGATIVE

The test is evaluated each time the record is saved, and status is only changed if a valid comparison can be made.

Status routing		
Field	Operator	Expression
<div>Kontakt</div>	<div>=</div>	<div>Happy</div>
Routing	Test positive	<div>Interesseret</div>
	Test negative	<div>Afvist</div>
		<div>Add</div> <div>Cancel</div>
