Button: Parameterized URL

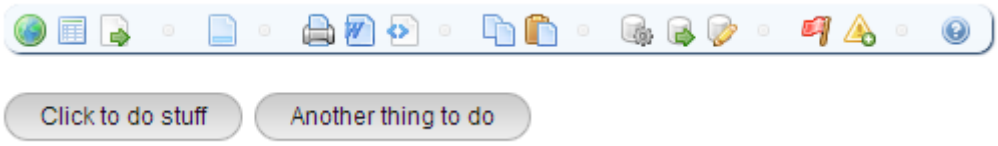

Button to navigate somewhere else. Can be to an external url.

Properties

- Type: Action button
- Groupable: No
- Show in lists: No
- Searchable: No
- Requires configuration: Yes

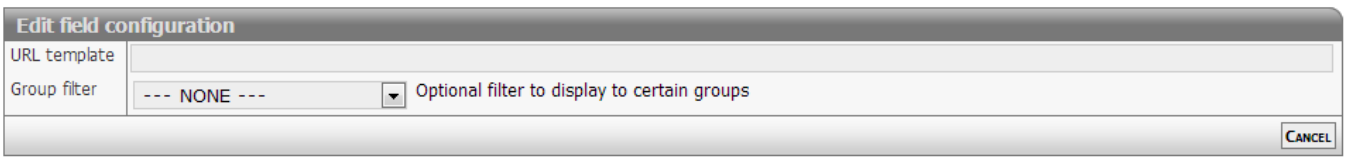

User interface

Field in show mode

Due to its nature this field has no special editing mode.

Configuration

URL template: Here you write the target url of the button link. You can use data from a field with the syntax [*DATA*]. DataID can likewise be used via [DataID]. It is also possible to use this field to point to some other location in the application by starting the url from "main?".

Group filter: Contrary to what it says, you can only filter to a single group, not several.

Developer info

- FeltTypeID: 740
- SQL datatype: N/A
- Class name: FieldParameterLookup
