Upload / download of files including versioning

Note that a class is added to the page while uploading resources: **uploadInProgress**

In case you want to prevent the user pressing update, the buttons can be hidden with this CSS

```
.uploadInProgress .tsUpdateButtons { display: none; }
```

## Reacting to uploads

The platform sends out custom triggers on upload start, finish and failure.

To react to these, use the following example

```
$(".custom-file-input").on("TS_UploadStart", () => {  
  // React  
})  
$(".custom-file-input").on("TS_UploadFinished", () => {  
  // React  
})  
$(".custom-file-input").on("TS_UploadFailed", () => {  
  // React  
})
```
