## Configuration

[INSERT IMAGE]

This field requires configuration of both parameters before it shows.

## Config1

The SQL-query executed, to list the items in the table.

The first column should be \*DataID\* of the subitem, but it doesn't have to be. As long as \*a\* column includes this data.

To relate the subtable to the current item, ad a \*where clause\* comparing to \*[DataID]\*, where \*[DataID]\* will be replaced be the current records DataID.

## Config2

The Label of the input column in the table.

## Developer info

- FeltTypeID: 232
- SQL datatype: INT(11)
- Class name: FieldMultiInputSubformListSQL
