Filter with single parameters including standard security.

Properties

- Type: Complex
- Groupable: No
- Show in lists: Yes
- Searchable: Yes
- Requires configuration: Yes

User interface

Field in show mode

Kategorier Again

Field in edit mode

The image shows two side-by-side screenshots of a user interface. The left screenshot shows a form titled 'test multiselect 2' in edit mode. The 'Kategorier' field is a multiselect with options 'World' and 'Again', where 'Again' is selected. The 'Type' field is a dropdown menu with 'Produktion' selected. The 'Status' field is a dropdown menu with 'New item' selected. The 'Revision' field shows the value '8'. There is an 'Opdater formularen' button at the bottom. The right screenshot shows a table titled 'test multiselect 2 kategorier' in show mode. The table has three columns: 'First field', 'Type', and 'Status'. The 'Type' column is circled in red, and a red arrow points from the 'Kategorier' field in the form to this column. The table contains three rows: 'Again' with 'Produktion' and 'New item', 'World' with 'Produktion' and 'New item', and 'Hello' with 'Salg' and 'New item'. Below the table is a navigation bar with 'SIDE 1 AF 1', 'POSTER 3', and 'SIDELÆNGDE: 1 1'. At the bottom, it says 'Rendered page in 0.0040 seconds (0.0040+0.0)'.

First field	Type	Status
Again	Produktion	New item
World	Produktion	New item
Hello	Salg	New item

Configuration

Edit field configuration	
Solution source	<input type="text"/>
Source filter attribute	<input type="text"/> (remote field system name)
Filter value	<input type="text"/> (local field system name OR expression)
<input type="button" value="CANCEL"/>	

[Description of configs]

Special features

There is automatically added a special JS function named: **getValueDisplay + [FieldSystemName]**

- The function returns a comma separated list of *display* values.
- The function is only referable clientside.

Example for displaying the values selected in the field "My statements" (System name = "STATEMENTS"):

```
alert('You have selected the following values ' + getValueDisplaySTATEMENTS());
```

Developer info

- FeltTypeID: 230
- SQL datatype: INT(11)
- Class name: FieldMultiSelectSubform
