

Videos

Video gallery with thumbnails and player.

The video-player only works when Policy [filesystemStorageActive](#).

To enable down-scaling to 720p and 1080p, the storage has to be on AWS S3, and the Encoding Lambda-function has to be enabled.

As of version 11572 the thumbnail engine was changed to FFmpeg.

Servers updated to this version, or newer, have to manually download the appropriate [FFmpeg jar](#) and place it in the tomcat-libs folder.

The version of FFmpeg downloaded must be 7.1-1.5.11.

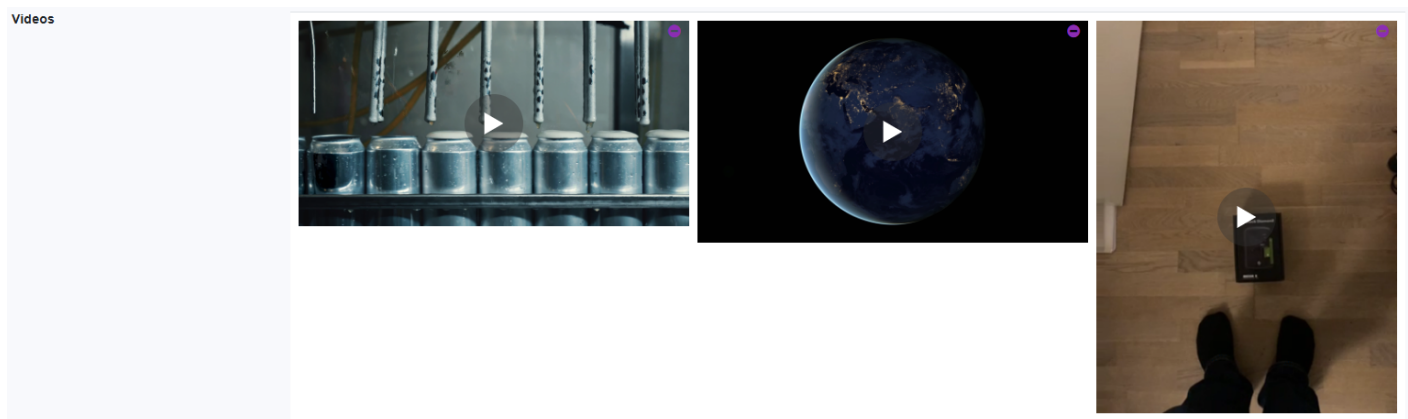

Servers installed via the ts-script, after jan 23. 2026 will already have this jar file as part of the default setup.
