Using a content source

Calling the **cmsinterface** servlet will provide you with an overview on how to use it.

Example:

```
https://www.acme.com/TempusServa/cmsinterface
```

The interface requires just the name of the source, but additional parameters can be provided.

Parameters

- **q**: Name of the interface (required)
  - This name must match "Unique NAME"
- **f**: Format of the result (optional)
  - Valid values: html json xml
- **v**: Parameter for dynamic values (optional)
  - The value will be substituted to the parameter in "Dynamic parameter"

Example:

```
https://www.acme.com/TempusServa/cmsinterface?q=mysource&f=json
```
