

Exporting spreadsheet data

Data exports can be done in a blink of an eye

1. In list mode of an solution click the XL sheet icon.
2. Choose relevant export options

Note that the export provided respects current filters, sort order and grouping.

The export options are as follows

- All records: Include all records in range
- All fields: Include all exportable fields
- Explode parents: Include fields from parent records (default in list)
- Explode children: Include fields from child records in denormalized format (default in list)
- System export: Use field system names in columns (good for later insert/updates)

Note that the export allow you to build VERY large data sets, so be careful when selecting the "All records" option.
