Timed status actions

Status actions are actions bound to a certain status, that has its type set to "timed".

This service will execute the actions, and will log the results. The service ensures that each action is only executed once per item. Exception to this rule: Changing the status to another, and moving the status back, will reset the "execute only once" feature.

As the time granularity for timed actions is DAYS, suggested service interval is once or twice day (1440 or 720 minutes).

Recommended max service interval: 15 minutes

Configuration

[If any configuration is available, and how to]

Developer info

- Classname: dk.p2e.blanket.services.ExecuteStatusActions
- Default isActive:
- Default interval: 60
