

Expanding a LUKS drive

First make sure that the drive is opened and mounted.

Run the commands

```
sudo cryptsetup resize [Drive]
sudo resize2fs /dev/mapper/[Drive]
```

To find out what [Drive] is supposed to be, examine the following commands output

```
sudo lsblk
```

In the following example it would be `crypt-sdf`

```
NAME      MAJ:MIN RM SIZE RO TYPE MOUNTPOINT
nvme0n1   259:1   0 20G  0 disk
└─nvme0n1p1 259:2   0 20G  0 part /
└─nvme0n1p128 259:3   0  1M  0 part
nvme1n1   259:0   0 50G  0 disk
└─crypt-sdf 253:0   0 30G  0 crypt /mnt/sda
```
