Embed TS in other sites

To embed the output of a public codeunit, on another website, the following code can be used.

```
<div id="tsContent"></div>
<script type="text/javascript">
    $.ajax({
        url: 'https://[SYSTEM-DOMAIN]/[APP-NAME]/mainpublic?command=[CODEUNIT-NAME]]',
        success: function(data) {
            $('#tsContent').html($(data).find(".mainContent").html());
        },
    });
</script>
```

It requires jQuery to be loaded beforehand.
