

JobnetConceptUri

Jobs uploadet to JobNet require the parameter JobDetails.JobLocation.OccupationConceptUri to be set to a valid OccupationConceptUri.

A wrapper has been made for this, it is part of the JobNet servlet.

Usage

Send a POST or GET-request to the servlet-endpoint "/getOccupations".

If an error occurs, the servlet will return HTTP-CODE 403 or 500 and a message in the body, telling you what was wrong.

If the request is successful a JSONArray will be returned.

Invalid OccupationConceptUri's will be returned, because of backwards-compatibility. Filter these via the "valid" attribute.

Sample

```
[
  {
    "valid": false,
    "description": "Borearbejdere (sten) betjener boremaskinen, der borer huller i stenblokke. De behandler granit, sandsten, marmor og skifer i overensstemmelse med specifikationerne.",
    "label": "borearbejder - sten",
    "uri": "http://data.star.dk/esco/occupation/2fbdc3fa-aeab-4e45-bccf-9421b84c687f"
  },
  ...
]
```
