

Give an assessment

How to give a rating on a submitted recording.

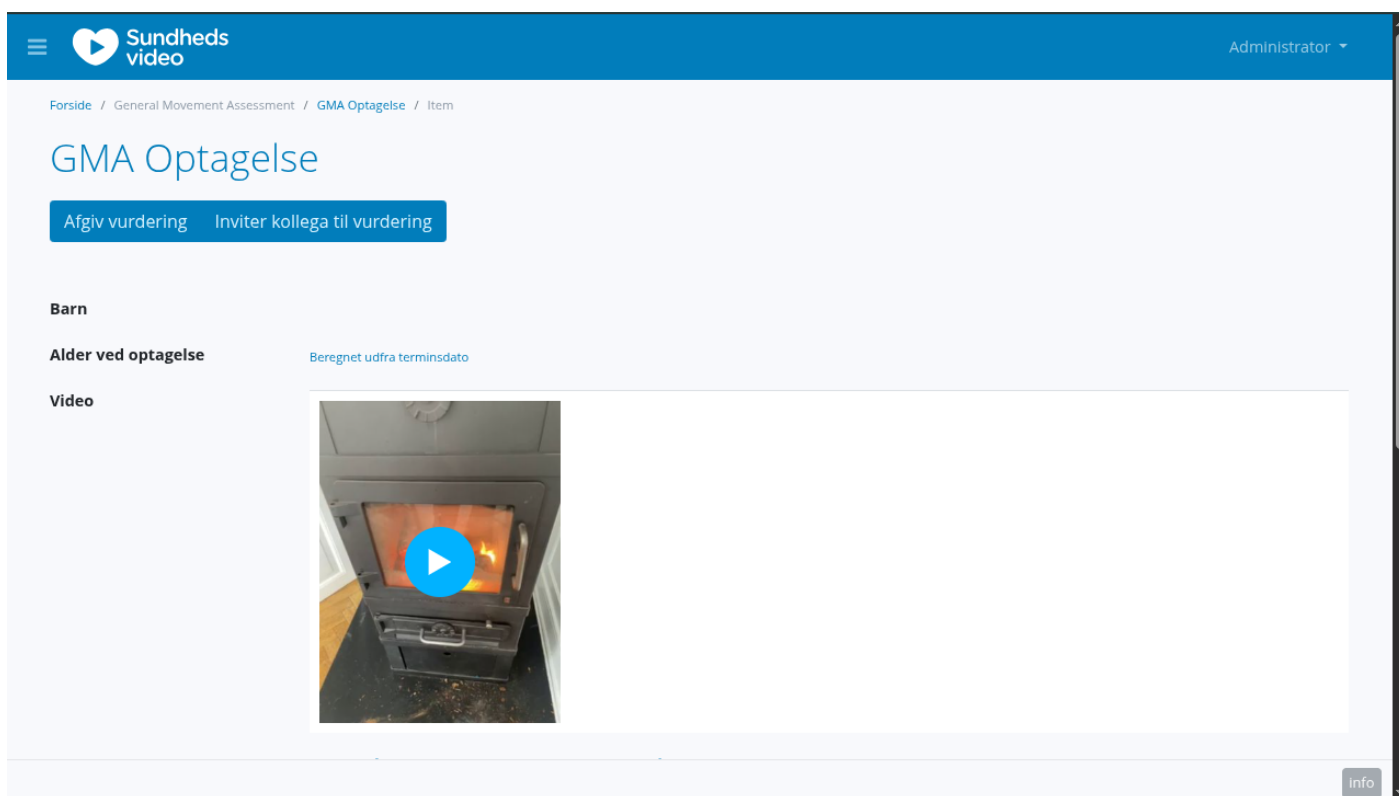

This introduction is available as a video and as a written article.

[INSERT VIDEO]

When a parent responds to one of the notifications to upload a video of their child, you, the responsible clinician, will receive an email about this, and the recording will be shown on your dashboard.

Clicking the link in the email, or the record in the list on your dashboard, redirects you to the recording, and a list of assessments of this specific recording.

At the top of this page, you will find two buttons: Give assessment and [invite colleague to give an assessment](#).

The screenshot shows the 'Sundheds video' interface. At the top, there is a blue header with the logo and the text 'Sundheds video' on the left, and 'Administrator' with a dropdown arrow on the right. Below the header, a breadcrumb trail reads 'Forside / General Movement Assessment / GMA Optagelse / Item'. The main title is 'GMA Optagelse'. Below the title, there are two buttons: 'Afgiv vurdering' and 'Inviter kollega til vurdering'. Underneath, there are sections for 'Barn', 'Alder ved optagelse' (with a link 'Beregn ud fra terminsdato'), and 'Video'. The video section contains a video player showing a fireplace with a blue play button in the center. At the bottom right of the page, there is an 'Info' button with a dropdown arrow.

Because this is test data, the name and age of recording of the child is missing, and it is a random video of a fireplace.

When clicking "Give assessment", you will be shown the following page.

The screenshot shows the 'Opret GMA vurdering' (Create GMA assessment) page in the Sundheds video system. The page has a blue header with the 'Sundheds video' logo and 'Administrator' user information. The breadcrumb trail is 'Forside / General Movement Assessment / GMA Vurdering / Opret'. The main title is 'Opret GMA vurdering'. Below the title, there are two tabs: 'Optagelse' (Recording) and 'Item' (Item), with 'Item' being the active tab. A video player shows a recording of a wood-burning stove with a blue play button overlay. Below the video player, there are three dropdown menus for 'Klassifikation' (Classification), 'Subklassifikation' (Subclassification), and 'Notater' (Notes). An 'info' button is located at the bottom right of the form area.

Because this is test data the system doesn't show the name and age of the child above the video.

On this page you can select a classification and sub-classification and write a couple of notes, if needed.

Once you are done, click the "save" button and you will be redirected back to the recording. Here you will be able to see the assessment you just gave.

Inviting a colleague will be covered on the [next page](#).

If you are done assessing the recording, scroll down on the page, click save and you will be redirected to your dashboard.

The recording is now marked as reviewed and should not be visible on your list of received recordings.

Once all recordings have been assessed and all second opinions have been reviewed or expired, the GMA course is ready for [final assessment](#).

Revision #10
