

# Change login session duration

To increase the number of minutes a session lasts do the following.

## **Warning!**

**This change affects all instances on a server!**

First, update the tomcat configuraion

```
sudo nano /usr/share/tomcat/conf/web.xml
```

Second, find the following config and adjust accordingly  
The attribute is defined in minutes.

```
<session-config>  
  <session-timeout>30</session-timeout>  
</session-config>
```

Third, restart tomcat

```
ts restart-webserver
```

Fourth, update the policies on the instance.

Update `sessionLifetimeMinutes` and `sessionLifetimeMaximum`.
