Description

Time recording has become a statutory requirement for all white-collar workers in the EU. Often the hours also represent value that must be settled with the customers: In both cases it is important that the process is both precise and easy, which in TS can be completed with two clicks. Additionally, time can be related to customers, projects or different types of species you want to report or settle on.

The benefit of the application is to get reliable hourly data with minimal effort.

Usecases

- Register hours
- Management overview

Content

- Work hours

Relations

- Part of Invoicing at some customers
- Included in SMB suite
